### WSSC Work on the Takoma Park/Silver Spring Montgomery College Campus

WSSC will be conducting work as part of the Leggett building construction work occurring on the Takoma Park/Silver Spring Campus.

After discussions with the City of Takoma Park, Barton Malow (BMC), and the College to manage and mitigate the impacts of the project, ***the WSSC work will commence this week.***

On Wednesday, June 14, 2023 WSSC will begin preparatory work for water valve removal in the area by performing minor excavation on Fenton Street, ***followed by minor excavation on Takoma Avenue on Thursday, June 15—both excavations will be temporarily covered with steel plates.*** The plates will be in place for as short of a duration as possible, likely until Friday, June 16.

On Friday, June 16, the water valves will be removed in the excavated areas on Takoma Avenue and Fenton Street. ***A temporary loss of water and sewer to some residences and on the campus is expected for 2 to 4 hours during Friday.*** Work will continue to restore the curb and gutter on Takoma Avenue on Monday, June 19, and restore the trench on Fenton Street on Tuesday, June 20. On Wednesday, June 21, paving will be restored on both Fenton Street and Takoma Avenue. The work each day is intended to start at around 9 a.m., and flaggers will be in place to direct traffic as work is completed in the street.

WSSC will notify the specific neighbors who will be impacted by water loss two days before the work starts.

BMC will complete the work on the Takoma Avenue parking lot exit and entrance later in the summer.

Montgomery College is committed to working with the City of Takoma Park, BMC, and WSSC to mitigate the impact on the neighboring homes and college buildings. Please let us know if you have any further questions.
